

IMPORTANT NOTICES

1. Construction materials as well as the service and environmental conditions vary on different sites. Therefore the present condition of the base material and the suitability must be checked by the user. If the user is in doubt, he should contact one of Würth's Representatives.

2. The information and recommendations given in this Design Manual are based on the principles, formulae and safety factors defined in approval guidelines, published research results and Würth's technical instructions, the operating manuals, the setting instructions, the installation manuals and other data sheets that are believed to be correct at the time of writing. The data and values are based on the respective average values obtained from tests under laboratory or other controlled conditions. It is the users responsibility to use the data given in the light of conditions on site and taking into account the intended use of the products concerned. The user has to check the listed prerequisites and criteria conform with the conditions actually existing on the job-site. Whilst Würth can give general guidance and advice, the nature of Würth products means that the ultimate responsibility for selecting the right product for a particular application must lie with the customer.

3. All products must be used, handled and applied strictly in accordance with all current instructions for use published by Würth, i.e. technical instructions, operating manuals, setting instructions, installation manuals and others.

4. Würth's aim is to always supply construction material with a quality and function of the latest state of technology. We therefore reserve the right to alter specifications, etc. without notice.

5. The given mean ultimate loads and characteristic data in the Design Manual reflect actual test results and are thus valid only for the indicated test conditions.

Due to variations in local base materials, on-site testing is required to determine performance at any specific site.

6. Würth is not obligated for direct, indirect, incidental or consequential damages, losses or expenses in connection with, or by reason of, the use of, or inability to use the products for any purpose. Implied warranties of merchantability or fitness for a particular purpose are specifically excluded.
